

Magnetotherapy

Magnetomed 8400 – MA1334

Magnetomed 7200 – MA1331

Magnetotherapy equipment generate a low-frequency magnetic field that improves tissue regeneration, especially bone tissues. The most commons indications are:

- 1 Recent fractures and consolidation delays
- 2 Pseudoarthrosis
- 3 Sudeck's disease and osteoporosis
- 4 Inflammatory and degenerative arthropathies
- 5 Obliterative arteriopathy
- 6 Bedsores
- 7 Psoriasis

MFC System

The EME applicators, thanks to the innovative MFC shielding system, drastically reduce the magnetic induction produced outside. This ensures a greater safety for the operator.

W.I.S. - Wood Injection System

Innovative and eco-friendly technology used to make solenoids. The robust, light and ecological wood is processed at high temperatures and pressed into special molds.
