DERMHAGE

The excellence of french dermal fillers

LABORATOIRES L'ESTHETIC developed a range of anti wrinkle fillers and skin booster. A safe, natural and long-lasting gel for patients. A precise and comfortable medical device for physicians.

Both for women and men, DERMHAGE developed a full protocole for men' injections.

Thanks to the breakthrough SRHA (Smooth Rheology Hyaluronic Acid) technology, these products are used for treating deep or superficial wrinkles, volume and for lip augmentation. Our particles are smooth and spherical instead of the traditional structure with angular rhomboids. Our patented technology preserves the natural qualities of our French hyaluronic acid.

Made of very pure and smooth hyaluronic acid, DERMHAGE is composed of four different references which can remodel each part of your face.

DERMHAGE products are class III medical devices with CE mark and ISO 13485, the highest European standards.
